## PROFILE

I'm passionate about creating beautiful, intuitive digital experiences that make a real impact. Looking to join a company that values creativity and growth, where I can dive into Front-end and Flutter development while working alongside people who love what they do. I want to be part of a team where I can both contribute and learn.

## EDUCATION

### Higher Secondary Education

Dalmia Public School - Sutrapada

### Bachelor's Degree

P P Savani University

CGPA - 7.6

## PROJECTS

### Gemini-clone

[GitHub Repo](#)

Created a Gemini clone using React, HTML, CSS, and JS, integrating Gemini's API to replicate key features. The project highlights front-end development skills and API usage.

### GradeGraph

[GitHub Repo](#)

Created a simple frontend of a ERP system using only HTML, CSS, Bootstrap and JavaScript. Made it so student as well as faculty can also login in it.

### Portfolio Website

[GitHub Repo](#) -- [Live Demo](#)

Designed and developed a dynamic portfolio website to showcase my skills and projects in a more creative and easy way. This portfolio is developed using only HTML, CSS and JavaScript.

### Youtube

[GitHub Repo](#)

This was my first project after learning only HTML and CSS, created this Structure of YouTube with Responsive Design.
